

Asia Hub and CIAERA Annual Meeting 2024

November 12-15, 2024 | Centara Riverside Hotel, Chiang Mai, Thailand

About IWFM, BUET

Institute of Flood Control and Drainage Research was established in 1974 and later renamed the Institute of Water and Flood Management (IWFM) in 2002. The Institute pursues research and capacity development in the field of water and flood management, which is vital for the economic development and social prosperity of the country. IWFM also aims to promote integrated water resources management by leveraging both basic and applied research to generate vital knowledge.

Vision And Mission

The vision of IWFM is to establish itself as a premier institute for the advancement of knowledge and development of human resources in water and flood management.

The missions are:

- To promote integrated water resources management.
- To generate knowledge through basic and applied researches.
- To share knowledge and expertise with other organizations.
- To develop professionals in water management.
- To provide expert advisory services.

Interdisciplinary Research

Advisory Services

Professional Trainings & Workshops

Laboratory Facilities

(a) Physical Modeling Facilities; (b) Remote Sensing and GIS Laboratory; (c) Climate Change Modeling Laboratory; and (d) Soil and Water Analysis Laboratory.

International Conferences

11th International Perspectives on Water Resources and the Environment (IPWE) Conference-2023

9th International Conference on Water and Flood Management (ICWFM-2023)

Postgraduate Programs

- Water Resources Development (WRD)
- Climate Modeling and Risk Management (CMRM)
- Humanitarian Engineering (HE)
